

PEAR Session

PHP Quebec Conference 2005

Welcome!

Welcome to the PEAR Session!

I hope you will have fun
and see some interesting stuff.

PEAR Session

PHP Quebec Conference 2005

Agenda

- Introduction
- What is PEAR?
- Project institutions
- Obtaining PEAR
- The PEAR installer
- Using PEAR
- Future outlook

PEAR Mailinglists

- pear-general@lists.php.net
 - Support
 - User-2-user help
- pear-dev@lists.php.net
 - Technical discussions
 - Project coordination
- pear-qa@lists.php.net
 - Quality assurance
- pear-doc@lists.php.net
 - Documentation team
- pear-webmaster@lists.php.net
 - Website & Co.

IRC:
#pear@EFNet

PEAR Session

PHP Quebec Conference 2005

PEAR Group

- PEAR steering committee
- Mailinglist: pear-group@php.net
- Handles outside relations
- Mediates on problems within PEAR
- Reserves a veto on all decisions, however does not have any real power beyond the trust the PEAR community has for them

PEAR Session

PHP Quebec Conference 2005

Agenda

- Introduction
- What is PEAR?
- Project institutions
- Obtaining PEAR
- The PEAR installer
- Using PEAR
- Future outlook

PEAR Session

PHP Quebec Conference 2005

Obtaining PEAR

- PEAR installer shipped with PHP since 4.3.0
- Automatically installed on Windows
- Per default activated when compiling on *nix
(do not use “--without-pear”)
- For earlier PHP versions bootstrap from <http://go-pear.org>
On *nix try `lynx -source http://pear.php.net/go-pear | php -q`
On Windows, save source and call PHP manually
- Tip: Ensure, that your PEAR path is added to the `include_path` directive in `php.ini`!

PEAR Session

PHP Quebec Conference 2005

Agenda

- Introduction
- What is PEAR?
- Project institutions
- Obtaining PEAR
- The PEAR installer
- Using PEAR
- Future outlook

PEAR Session

PHP Quebec Conference 2005

The PEAR Installer

- Different interfaces:
 - Console (build in)
 - Web
 - GTK
- Easy usage
- Perform a lot of actions on packages:
 - List local/remote
 - Install/Uninstall/Upgrade directly from the web
 - Get package information
 - Dependencies
 - Package packages
 - Test packages

PEAR Session

PHP Quebec Conference 2005

PEAR Installer Commands

- Important PEAR Installer commands

- \$> pear [un]install [PackageName]
- \$> pear upgrade[-all] [PackageName]
 - Use -f option to force action
 - Instead of PackageName point to package.xml or tar.gz in the filesystem or URL
- \$> pear list[-upgradeable]
- \$> pear config-show
- \$> pear config-set
- \$> pear package[-validate] [package.xml]

PEAR Session

PHP Quebec Conference 2005

PEAR Installer Live

Live demonstration of the PEAR installer.

PEAR Session

PHP Quebec Conference 2005

Agenda

- Introduction

- What is PEAR?

- Project institutions

- Obtaining PEAR

- The PEAR installer

- Using PEAR

- Future outlook

PEAR Session

PHP Quebec Conference 2005

Basics on using PEAR

- Important precondition:
 - `include_path` must contain the correct path to PEAR!
- Packages contain a main file, which has to be included (no others).
- Package names map to their location in PEAR:
 - DB --> DB.php
 - Net_FTP --> Net/FTP.php
 - ...
- Class names map to package names:
 - DB --> DB()
 - Net_FTP --> Net_FTP()
 - (attention, most packages do not use direct instantiation)

PEAR Session

PHP Quebec Conference 2005

Agenda

- Introduction
- What is PEAR?
- Project institutions
- Obtaining PEAR
- The PEAR installer
- Using PEAR
- Future Outlook

PEAR Session

PHP Quebec Conference 2005

Outlook

- PEAR 1.4 is currently in alpha stadium with exciting new features:
 - Channel support
 - Automatic dependency resolving
 - Remote-installation support
 - New package.xml format
 - ...
- Hopefully ready by the end of May.
(do not count on that, you know, it's open source)

PEAR Session

PHP Quebec Conference 2005

Agenda

- Introduction
- What is PEAR?
- Project institutions
- Obtaining PEAR
- The PEAR installer
- Using PEAR
- Future outlook

The end

PEAR Session

PHP Quebec Conference 2005

Final conclusion

- PEAR offers you:
 - A huge collection of high quality PHP components to make your development:
 - ... more comfortable
 - ... more secure
 - ... much faster
 - A unified backend to install PHP classes and C extensions.
 - A distribution way for your PHP code.
 - Standards for PHP development.
 - A lot of PHP knowledge bundled in one place.

PEAR Session

PHP Quebec Conference 2005

Discussion

• Do you have:

- Questions?
- Critics?
- Ideas?
- Comments?

Please state them now!

PEAR Session

PHP Quebec Conference 2005

Thank you for...

- ... listening to my bad English.
- ... your interest in PEAR and PHP in general.
- ... coming to the PHP Quebec Conference 2005

I hope you enjoyed the workshop
and wish you much fun here at the Conference!

Tobias Schlitt <toby@php.net>
